

## P-Glossary

### Green Productivity (GP) methodology

Green Productivity (GP) methodology consists of six major steps (success in six). Each step can be completed by following specified tasks, of which there are 13:

**Step 1: Getting started**

Task 2: Walk-through survey and information collection

**Step 2: Planning**

Task 3: Identification of problems and causes Task 4: Setting objectives and targets

**Step 3: Generation, evaluation, and prioritization of GP options**

Task 5: Generation of GP options

Task 6: Screening, evaluation, and prioritization of GP options

**Step 4: Implementation of GP options**

Task 7: Formulation of GP implementation plan

Task 8: Implementation of selected options

Task 9: Training, awareness building, and developing competence

**Step 5: Monitoring and review**

Task 10: Monitoring and evaluation of results

Task 11: Management review

**Step 6: Sustaining GP**

Task 12: Incorporating changes into organizational system of management

Task 13: Identifying new/additional problem areas for continuous improvement

The methodology can be applied both in profit-making as well as nonprofit organizations. It has been found useful in community development projects as well.
